Spanish — Intermediate Proficiency

Web developer with a background in system administration and IT help desk. Interested in leveraging my aptitude with technology, language, and mathematics, as well as my problem solving skills, and my logical thinking into creating beautiful and responsive software.

Experience

General Assembly

Boston, MA

Web Development Immersive

Sept 2018 - Dec 2018

12 week, 500+ hour web development bootcamp combining classroom-based learning and project-based learning. Cultivated invaluable skills in addition to software engineering such as adapting a growth mindset towards learning; reading, writing, and interpreting documentation; communicating about technology; agile development. Four projects developed including:

► Final Project: full stack single page application developed in JavaScript, HTML5, CSS3, and jQuery on the front-end, Ruby On Rails and PostgreSQL on the back-end; front-end later rewritten in React; application allows users to vote on their favorite mixes by DJs

► Group Project: full stack single page application developed in JavaScript, HTML5, CSS3, jQuery, and Handlebars on the front-end, Node.js, MongoDB, and Stripe API on the back-end; e-commerce platform allowing users to add items to a cart and check out

► Full Stack Project: full stack single page application developed in JavaScript, HTML5, CSS3, and jQuery on the front-end, Ruby On Rails and PostgreSQL on the back-end; movie database allowing users to perform CRUD actions for films they've watched

► Front End Project: front-end single page application developed in JavaScript, HTML5, CSS3, and jQuery for consumption of a Ruby On Rails based back-end; tic tac toe game.

Andrew Associates

Enfield, CT

IT Administrator

Sept 2016 - Aug 2018

IT administrator and help desk analyst. Reported directly to CEO and CFO. In charge of technical aspects responsible for production of non-technical product in a HIPAA, PIPA, and SOC 2 Type II compliant environment. Responsibilities included:

► IT help desk for a 30-seat, 30-user environment including a mixture of Windows-based PCs and Apple Macs, as well as administration of several printer controller devices

► Server administration and monitoring for Windows Server 2008 R2 (including Microsoft Exchange 2010), Mac OS Server, and Citrix XenServer

► Network engineering, administration, and security including SonicWALL firewalls, and Cisco switches and routers

► Writing and administration of documentation including business integrity, business continuity, and disaster recovery plans as pertained to IT department

► Disaster recovery including maintenance and disposal of backups including hard drive backups as well as cloud backups

► Aid third party auditors in uncovering and mitigating enterprise risk for compliance
